

VITA-BLOOD DIAGNOSTICS

Patient:	Johnathan Alexander Doe	Gender / Age:	Male / 42
Blood / BMI:	O Positive / 23.8	City / Country:	Chennai / Tamil Nadu
Phone:	+91 98765 43210	Emergency Contact:	+91 98765 43211
ID:	BD-558291	Date:	2026-08-16

Complete Blood Count (CBC) with Differential

Parameter	Result	Status	Reference Range
White Blood Cells (WBC)	6.8	Normal	3.8 - 10.8 k/uL
Red Blood Cells (RBC)	4.95	Normal	4.20 - 5.80 M/uL
Hemoglobin (HGB)	15.2	Normal	13.2 - 17.1 g/dL
Hematocrit (HCT)	45.1	Normal	38.5 - 50.0 %
MCV	91.1	Normal	80.0 - 100.0 fL
MCH	30.7	Normal	27.0 - 33.0 pg
MCHC	33.7	Normal	32.0 - 36.0 g/dL
RDW	13.2	Normal	11.0 - 15.0 %
Platelets	245	Normal	140 - 400 k/uL

VITA-BLOOD DIAGNOSTICS

Patient:	Johnathan Alexander Doe	Gender / Age:	Male / 42
Blood / BMI:	O Positive / 23.8	City / Country:	Chennai / Tamil Nadu
Phone:	+91 98765 43210	Emergency Contact:	+91 98765 43211
ID:	BD-558291	Date:	2026-08-16

WBC Differential Breakdown

Parameter	Result (%)	Absolute	Reference (%)
Neutrophils	60.5	4.1 k/uL	40 - 74 %
Lymphocytes	28.2	1.9 k/uL	14 - 46 %
Monocytes	8.4	0.6 k/uL	4 - 13 %
Eosinophils	2.1	0.1 k/uL	0 - 7 %
Basophils	0.8	0.05 k/uL	0 - 3 %

Inflammatory Markers

Parameter	Result	Status	Reference Range
C-Reactive Protein (CRP)	2.4	Normal	< 5.0 mg/L
Erythrocyte Sed Rate (ESR)	12	Normal	< 15 mm/hr

VITA-BLOOD DIAGNOSTICS

Patient:	Johnathan Alexander Doe	Gender / Age:	Male / 42
Blood / BMI:	O Positive / 23.8	City / Country:	Chennai / Tamil Nadu

Historical Blood Parameter Comparison

Test	Today (2026)	Last Year (2025)	2 Years Ago (2024)
Hemoglobin	15.2	14.9	15.0
WBC Count	6.8	7.1	6.5
Platelets	245	230	255
CRP	2.4	3.1	2.8

Clinical Interpretation & Summary

- All major blood indices are within standard reference ranges.
- The complete blood count shows robust erythropoiesis with optimal hemoglobin levels.
- Leukocyte count and differential indicate normal immune function without evidence of acute infection or systemic inflammation.
- Inflammatory markers (CRP and ESR) are well within the normal limits.
- Historical comparison shows excellent stability in hematological parameters over the past 24 months.
- Recommendation: Maintain current healthy lifestyle and dietary habits. Follow up routinely in 12 months.
